Notes:

aspenONE Engineering suite consists of the following products:
 Aspen Plus family, Aspen HYSYS family, Aspen Exchanger Design & Rating (EDR), Aspen Economic Evaluation (EE), Aspen Basic Engineering (ABE), aspenONE Web Server, and aspenONE Exchange.

Suite	Engineering Suite							
V9 Platform Specification	AES Property System 32-bit	Process Modeling (Aspen Plus) 32-bit	Exchanger Design & Rating (EDR) 32-bit	Process Modeling (Aspen HYSYS) 32-bit	Economic Evaluation (EE) 32-bit	Basic Engineering Client	Basic Engineering Server	Aspen OnLine (AOL)

¹ For standalone deployments of Engineering products, server type I is sufficient

EDR does not use any database servers. Deploys its own Access DB files.

When running software on a virtual machine, the machine should meet the same requirements.

If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.

Your Aspen SLM Server must be installed and running prior to installing any V9 product.
